Establishing Beacon Centres

Training & Development for Mosque Management & Board members

Mosque Operational and Needs Analysis

Faith Associates has developed a unique way of sensitively looking at the operational and service delivery capability of a Mosque. The analysis can also reveal the needs of the Mosque or Madrassah to be able to effectively deliver for the congregation and wider communities, via formal and informal interviews and questionnaires conducted by culturally competent team members.

Mosque Management Training

A two day training programme has been developed following hundreds of interviews and the production of

a Mosque Management Toolkit. The comprehensive training looks at all the main functional areas that the Mosque Management needs to know, about running an effective Mosque keeping in mind their statutory and Islamic responsibilities.

Mosque Capacity building

Faith Associates can help Mosques build effective management structures and operational procedures to enable their Mosques to flourish and Inspire. By designing Mosque constitutions, policies, procedures, effective communication channels and other governance tools, Faith Associates is helping Mosques to become Beacon centres.
